Nr. 0353-1112-60

Employment barometer in 3rd quarter 2011

Employment continues to grow despite first signs of slowing down

Neuchâtel, 12.12.2011 (FSO) – **The employment barometer indicators (revised data) published quarterly by the Federal Statistical Office (FSO) indicate a solid increase in employment compared with the same quarter of the previous year. However, for the first time in two years the employment outlook indicator and the number of job vacancies show a very slight decline in year-on-year comparison. Employment should, nevertheless, remain stable for the next quarter.**
