Key indicators

A Definition:

- **Indicators with importance given arbitrarily, or on the basis of a political or scientific consensus**
- **Proxy of a group of indicators**
- **Series of limited size**

Key indicators

Key indicators

Selection of key indicators

1. Set by a panel of experts

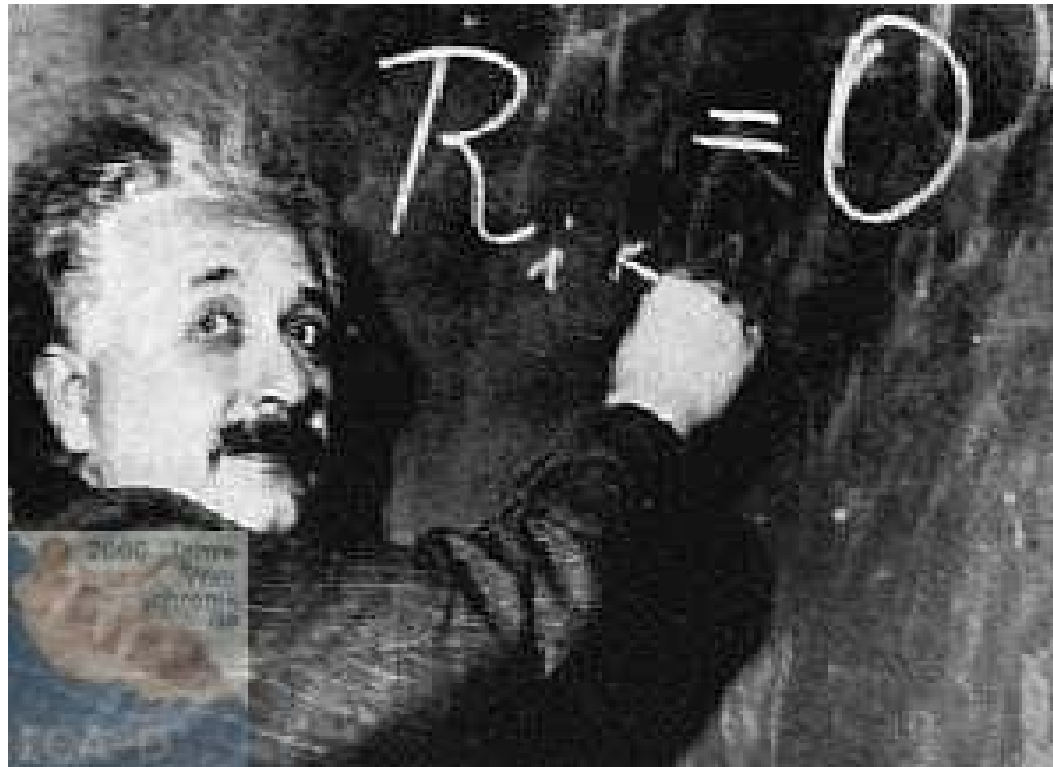

Selection of key indicators

2. Drawn from political programs and strategies

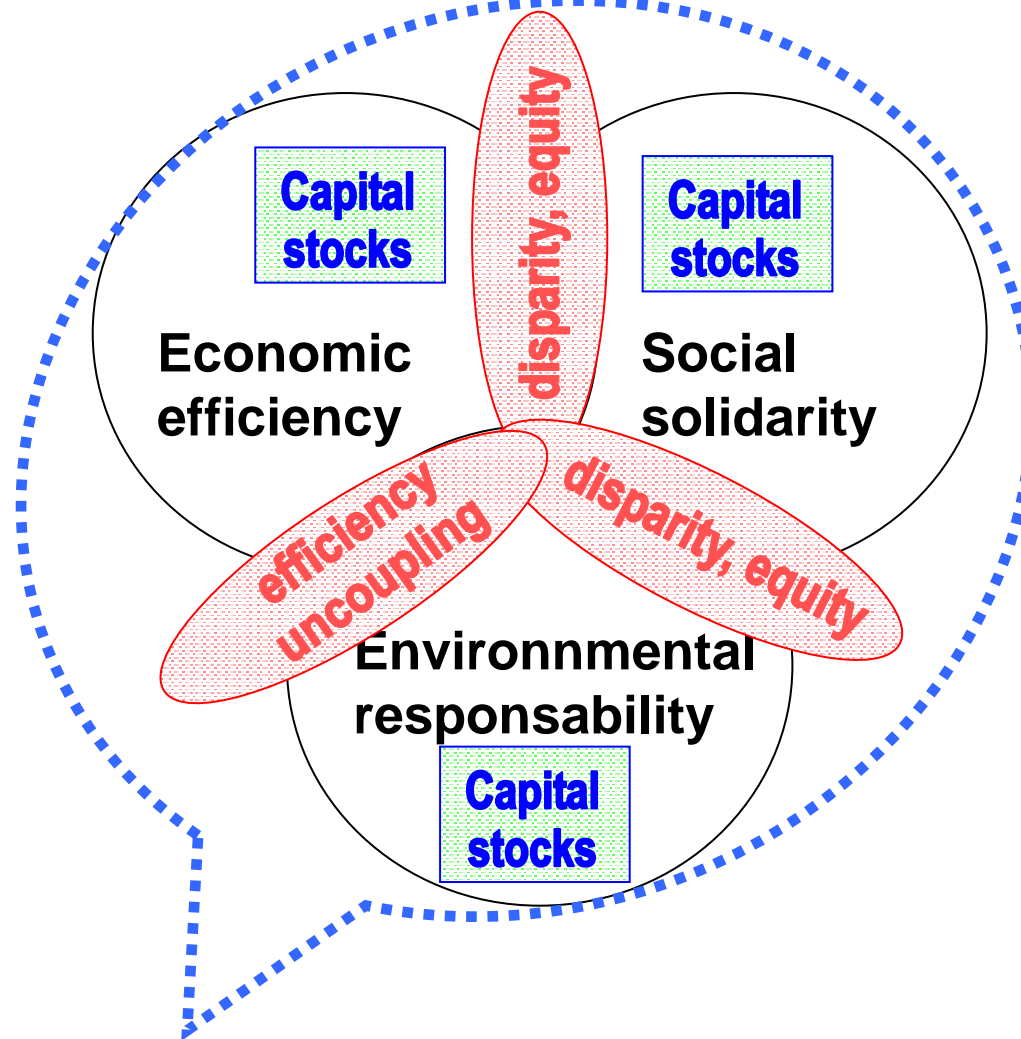

Selection of key indicators

3. Determined according to a deductive approach

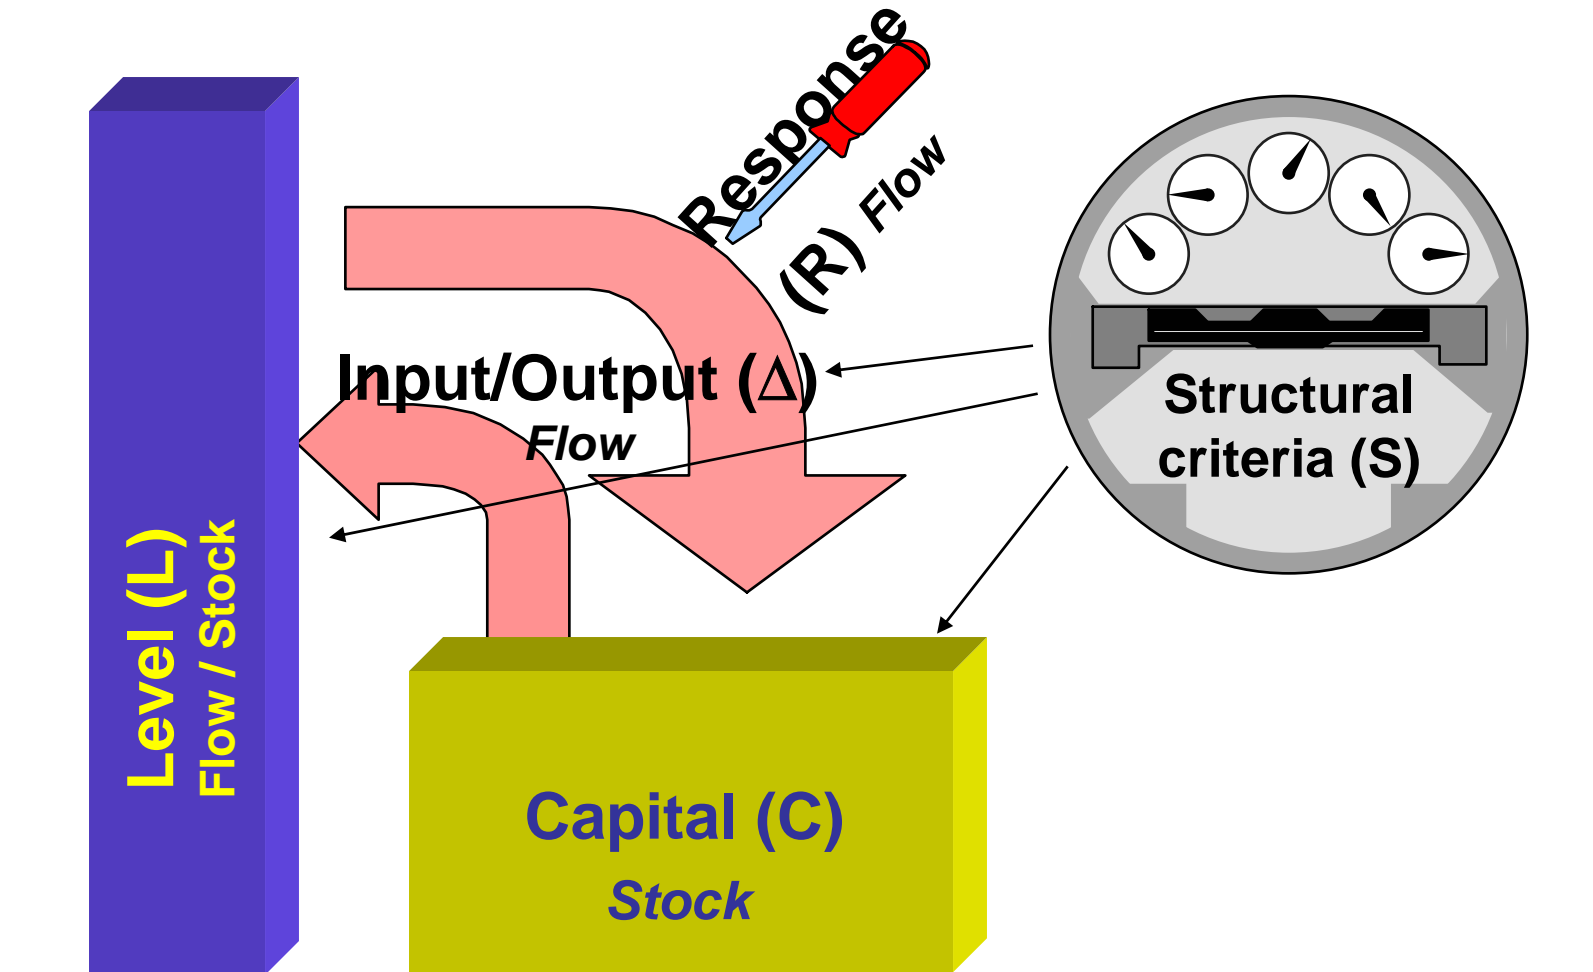

Deductive approach

Evaluated
Time series

12 L, 15 C, 25 S

Learning from this exercise

In the precise case of monet:

- The foundation of the monet system guarantees a solid base for the deductive approach
- (too) great importance given to efficiency indicators

Learning from this exercise

In general, the deductive approach allows:

- To quickly get to the essential
- Transparency
- To push arbitrary choices back to end of the process

But:

- Discussions with experts and/or stakeholders are still necessary and inevitable

Conclusions

Indexes are mainly (only?)
communication (or provocation?) tools

Key indicators allow to analyze, to
show patterns

Dashboards: please ask the experts in
this audience...
