

Development of various poverty indicators among employed persons

Due to the reformulation of certain questions, from 2011 the material deprivation rate is no longer comparable with previous years. Furthermore, due to methodological adjustments the values of all SILC indicators from 2014 can no longer be compared with previous years. Employed persons are defined here as persons aged 18 or over who were self-employed or employed for more than half of the months in the year before the survey (most frequent activity status).
